## Auction Item Tips

- Try to select items that you think can sell for at least \$20. Our minimum commission is \$19.95 per item sold, so if you don't think it can sell for more than that, it's not worth it.
- Very unique items can be tougher to sell on eBay b/c there might not be a large number of people looking for them. One exception would be collectibles, which tend to sell well.
- Very large items are hard to sell because they have high shipping costs.
